

# BTC\_A1 Token Whitepaper

Ledger Systems Key to Wealth

## Introduction

BTC\_A1 is a decentralized BEP20 token deployed on Binance Smart Chain (BSC) with a fixed supply of 21 million tokens. Inspired by Bitcoin's principles, BTC\_A1 ensures security, immutability, and decentralization. The token is free from mint, burn, freeze, pause, or admin controls, making it trustless and community-driven.

## Tokenomics

- **Total Supply:** 21,000,000 BTC\_A1
- **Owner Allocation:** 1,500,000 BTC\_A1
- **Public Allocation (Liquidity):** 19,500,000 BTC\_A1
- **Contract Address:** 0xde9b14f65cdc02941cb13feb3824d23e3f5a7f5e

## Security

The BTC\_A1 smart contract is immutable and verified on BscScan. Its design ensures that no central authority, developer, or external entity can alter its rules. Like Bitcoin, BTC\_A1 is censorship-resistant, tamper-proof, and transparent to all holders.

## Roadmap

- **Phase 1:** Token Deployment & PancakeSwap Liquidity
- **Phase 2:** Whitepaper Release & Community Growth
- **Phase 3:** Listing on CoinGecko & CoinMarketCap
- **Phase 4:** Centralized Exchange (CEX) Listings – Binance, LBank, BingX
- **Phase 5:** Ecosystem Expansion & Global Adoption

## Vision

BTC\_A1 aims to bring Bitcoin-level security and trust into the Binance Smart Chain ecosystem. The token empowers community members, investors, and traders with an asset that is transparent, fair, and free from central manipulation.

## Conclusion

With a fixed supply, decentralized architecture, and transparent tokenomics, BTC\_A1 is positioned to become a trusted digital asset in the blockchain space. Our mission is to combine the security of Bitcoin with the efficiency of Binance Smart Chain for a sustainable crypto future.
